Final Scores:

$M(E, \hat{E})$ = 0.87

$M^{\%}(E, \hat{E})$ = 100%

⭐: 2.5s-5.0s Plant flying out of small pot looks unrealistic.

🤖: 3.9s-5.0s The cat knocks over the small plant, but the plant does not fall realistically…

Similarity: 8/10 | Prec: 1.0

⭐: 2.2s-5.2s Cat does not knock the plant off the windowsill.

🤖: 4.3s-5.0s …the pot itself is not shown as having been knocked over or removed. The plant seems to vanish…

Similarity: 7/10 | Prec: 1.0

⭐: 2.7s-5.7s Unrealistic cat movement…

🤖: 3.5s-4.5s The cat's body appears to stretch and twist unnaturally as it knocks over the plant…

Similarity: 8/10 | Prec: 1.0

(b) **Prompt:** A person stands in a room with a tiled floor, interacting with a modern car door. They hold the door handle and pull it to open the door. The door opens fully, with the camera maintaining a consistent perspective throughout the sequence.

⭐ **GT Annotation:**

⭐: 0.5s-1.5s Car is missing many important parts (tires, windows, steering wheel)

⭐: 2.5s-6.0s The front wheel and front portion of the car only appear following the car door's opening.

Gemini 2.5 Pro

🤖: 0.0s-5.0s The person has unnaturally thin and elongated body proportions throughout the video

🤖: 1.0s-3.5s The person's hand does not realistically grip or pull the handle

🤖: 2.0s-4.0s The car door appears to warp and bend unnaturally as it opens

Q3-VL-8B

🤖: 0.0s-5.9s The car door opens with unnatural smoothness and speed, defying typical mechanical resistance and hinges.

🤖: 0.0s-5.9s …the camera angle slightly shifts during the door opening.

🤖: 0.0s-5.9s The interior of the car becomes visible without any transition suggesting a jump cut or unrealistic rendering.

Q3-VL-8B (Window)

🤖: 2.0s-3.8s The prompt specifies "the camera maintains a consistent perspective", yet the door opening creates a visual distortion in perspective.

🤖: 4.0s-5.9s The prompt specifies opening the door, but the door's interior panel appears to move unnaturally fast and smoothly.
